FOR BUILDERS • FIRE-TREATED LUMBER, TRUSSES & I-JOISTS

Nontoxic, affordable fire protection for every wood product on the job.

FireProShop fire-treated lumber, roof trusses and floor trusses are covered by a national Technical Evaluation Report, DrJ TER 2504-101. The chemistry is certified under the EPA Safer Choice program.

WHAT THE NATIONAL TER REQUIRED

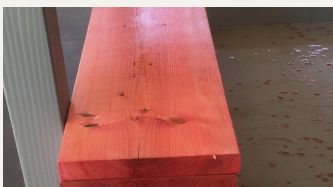

To hold a current national TER, we had to prove the treatment does not reduce bending strength or shear, and that it is not corrosive to fasteners. It passed on all three. Allowable design stresses in dry use are the same as untreated wood.

DUST HAZARDS FROM FRTW

The chemistry on conventional FRTW can create toxic dust for the carpenters cutting it, and special masks are recommended. It also reduces wood-fiber bending strength. Our treatment does neither.

FIREPROSHOP TREATED WOOD VS. FRTW

	FIREPROSHOP	FRTW
Bending strength	No reduction	Reduced
Fasteners	Bright nails permitted • ASTM G31	Corrosion-resistant required
VOC	Zero VOC • UL GREENGUARD Gold	—
Chemistry	EPA Safer Choice certified	—
Cutting	No special mask	Toxic dust • masks recommended

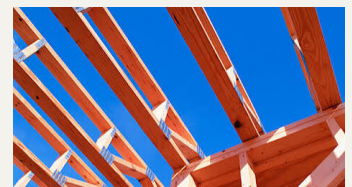

TREATED DF, MILL APPLIED

STUDS, READY TO SHIP

STAMPED • TER 2504-101

TREATED ROOF TRUSSES

Why would any production or custom builder frame with raw, untreated I-joists and raw roof trusses in the middle of an insurance crisis? Every fire official in America would thank you for making buildings safer for the firefighters who go in when a raw I-joist floor or raw roof collapses.

STEVE CONBOY • FOUNDER, FIREPROSHOP

Send us the framing package.
We will price it treated.
